COMMUNITY CONFERENCE

October 2, 2026
Virtual

Live captions in Spanish, Ukrainian, Portuguese and Italian

Alongside the Zoom webinar we are providing live captions translated into Spanish, Ukrainian, Portuguese and Italian. You can read them on any phone, tablet or computer while you watch Zoom.

1. Open this link: <https://webtrans-xcuw.onrender.com>
2. Enter the password: **UnitedBlueprint2026**
3. Tap your language at the top: English, Español, Українська, Português or Italiano.

That is all. Captions appear a few seconds behind the speaker and the page scrolls on its own.

- **Hear it spoken:** tap the **Read aloud** button and captions are read out in your language using your device's own voice. Turn the Zoom volume down or mute it so the two do not compete. You can choose a voice and speed next to the button.
- **Bigger text:** use the A- and A+ buttons. The 🌓 button switches between light and dark.
- **Breaks:** during breakout sessions and breaks the page says "Paused for a break". Captions resume when the main session restarts.
- **Second screen:** many people keep Zoom on a computer and the captions on a phone.
- **If the page stops updating,** reload it. You stay logged in for 24 hours.
- **If you scroll up** to re-read something, a "Jump to latest" button brings you back.

The captions are produced by automatic speech recognition and machine translation, so occasional mistakes are possible. Corrected subtitles will be included with the talk recordings on YouTube after the conference.
